Merchants Mill Pond

This trip was from 12/5/20 to 12/6/20. The trip was at Merchants Mill Pond. The weather on this trip was temperatures in the low 50s, little precipitation, and the humidity was around 60. This trip was big for the troop as it was Vincent’s first trip as the SPL. For this trip the troop was divided into three groups, one that was biking, one that was hiking, and one that was canoeing. The canoes and the bikers got to the campsite first. This trip didn’t have a main focus besides working on rank and having fun. Scouts cooked individual meals, due to the fact that we didn’t have any cars. There was a cap of 40 scouts due to covid restrictions at the time. Everyone went back to the vehicles the same way they went in.
